In chest infections

# Ceporin

provides effective, safe  
broad-spectrum activity

Cephaloridine . . . "is not inactivated by penicillinase and has a remarkably broad spectrum."

*Practitioner*, 1965, 195, 408

In serious infections of the respiratory tract, especially mixed infections, the unique activity of Ceporin can be used to particularly good advantage. The common infecting organisms in bronchitis and bronchopneumonia are highly sensitive to bactericidal action of Ceporin, including penicillinase-producing staphylococci. This is why Ceporin frequently gives dramatic clearance of infection, rendering the sputum sterile and providing rapid relief of symptoms. Ceporin can be safely used in patients hypersensitive to penicillin. In all patients and in all indications the injections are

remarkably painless and make the whole dose available to the body.

**Other indications** for Ceporin include urinary tract infections, meningitis, septicaemia, bacterial endocarditis and soft tissue infections.

## SPENCER "FREE ACTION" SUPPORT BRIEF FOR MEN

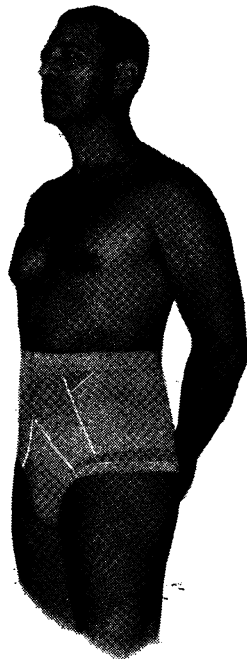

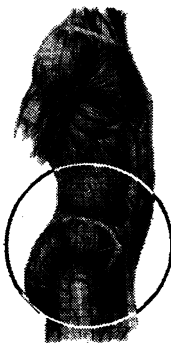

Spencer's Revolutionary new concept of support in non-rubber, spandex elastic for back and abdomen.

Subtle in design to the degree of being mistaken for tailored, body fitting underwear in the locker room, it actually provides powerful, functional support in elevating the viscera, thus relieving low back strain.

- \* Front inner panels follow natural musculature
- \* Soft, expansion areas at top edge and around legs allow motion and minimize bulging
- \* Comfortable, accommodating crotch section has easy access opening

Patients have experienced relief from chronic low back pain while wearing the Support Brief

We recommend this Brief for minor low back conditions and where it is considered beneficial to raise abdominal contents in aiding respiration, relieving ptosis, minimizing pooling of blood in lower abdomen, etc.

'Indocid' is supplied as 100 mg suppositories and  
25 mg capsules.

Detailed information is available to physicians on  
request.

For the majority of patients, oral administration  
of 'Indocid' (as capsules) is preferred, but in certain  
circumstances it may be desirable to give 'Indocid'  
as suppositories.

**'Indocid' Suppositories may be useful:**

- in patients unable to tolerate an effective  
dosage of 'Indocid' by mouth.
- where it is desirable to administer a higher  
dosage of 'Indocid' than is possible orally.
- where relief of night pain and morning  
stiffness is particularly important. One sup-  
pository at bedtime will frequently give relief  
for 12 to 16 hours.

## MEDICINE IN BRITAIN

A Guide for  
Overseas Doctors

C. ALLAN BIRCH, M.D., F.R.C.P., Physician, Chase Farm Hospital, Enfield, Middlesex.

This book has been written to help the 3,000-4,000 doctors from overseas who are spending a period of their lives working as registrars and residents in British hospitals. The structure of the National Health Service and the practice of medicine in Britain are explained, and guidance is given on a wide variety of medical topics, with special sections on paediatrics, surgery, obstetric and gynaecology. Relationships between the doctors and patients inside and outside hospital are covered, and basic British medical history and a glossary are included.

## GYNAECOLOGY

New in the  
Concise Medical Textbooks series

J. M. HOLMES, M.D., B.S.(Lond.), M.R.C.O.G., Consultant Obstetric and Gynaecological Surgeon, University College Hospital, London

This book provides the student with the fundamental principles of gynaecology on which his future practice may be based. The more common everyday problems are discussed and important aspects of pathology are included. There are chapters on contraception, marital problems seen in general practice, and a summary of the principles and scope of surgery and radiotherapy in gynaecological conditions.
